Subject Index, Volume 6, 1990

Acetaldehyde, 107
Acetate, 107
Acetylcholine, 409
Activator Ca^{2+}, 355
Aggregating platelets, 369
Alcohol, 108
Alcoholic myopathy, 107
Animal model of lymphoedema, 458
ANP, 67
Anti-inflammatory, 3
Antimony, 127
Aortic smooth muscle, 427
Arachidonic acid, 46
Arterioles, 355
Atherosclerotic disease, 35, 149
Atrial natriuretic peptide, 67

$ß_2$-agonist, 3
$ß_2$-receptor agonist, 437
$BaCl_2$, 369
Basement membranes, 395
Benzo-alpha-pyrones, 459
Benzo-gamma-pyrone, 459
Benzo-pyrone drugs, 457
Blood flow, 21, 67
Bradykinin, 409, 437
Brain microcirculation, 91
8 Br cGMP, 91

Ca^{2+} influx, 356
Calcitonin gene-related peptide, 465
Calcium, 355
Calcium channels, 355
cAMP, 93
Canine forelimb, 3, 409, 437, 465
Capillary, 159
Catecholamines, 409
Cellular permeability, 46
Cerebromicrovascular membrane fluidity, 46
cGMP, 91
CGRP, 465
Choroid plexus, 395
Circulatory control, 253
Contractile agonists, 183
Coronary blood flow, 285
Cranial window, 315
Cremaster muscle, 356
Cultured endothelium, 46

Diabetes mellitus, 149
Dibutyryl cAMP, 91
Diameter, 315
Dihydropyridine sensitive Ca^{2+} channels, 357

Edema, 21, 437
Edematogenic agent, 437
EDRF, 92, 183, 427
Efferent lymph vessels, 409
Endogenous vasodilators, 409
Endothelial, 159
Endothelial cells, 355, 427
Endothelial cell/smooth muscle, 409
Endothelial membrane fluidity, 46
Endothelin, 355
Endothelium, 369
Endothelium dependence, 91
Endothelium-dependent relaxation, 427

Subject Index, Volume 6, 1990

Acetaldehyde, 107
Acetate, 107
Acetylcholine, 409
Activator Ca^{2+}, 355
Aggregating platelets, 369
Alcohol, 108
Alcoholic myopathy, 107
Animal model of lymphoedema, 458
ANP, 67
Anti-inflammatory, 3
Antimony, 127
Aortic smooth muscle, 427
Arachidonic acid, 46
Arterioles, 355
Atherosclerotic disease, 35, 149
Atrial natriuretic peptide, 67

$ß_2$-agonist, 3
$ß_2$-receptor agonist, 437
$BaCl_2$, 369
Basement membranes, 395
Benzo-alpha-pyrones, 459
Benzo-gamma-pyrone, 459
Benzo-pyrone drugs, 457
Blood flow, 21, 67
Bradykinin, 409, 437
Brain microcirculation, 91
8 Br cGMP, 91

Ca^{2+} influx, 356
Calcitonin gene-related peptide, 465
Calcium, 355
Calcium channels, 355
cAMP, 93
Canine forelimb, 3, 409, 437, 465
Capillary, 159
Catecholamines, 409
Cellular permeability, 46
Cerebromicrovascular membrane fluidity, 46
cGMP, 91
CGRP, 465
Choroid plexus, 395
Circulatory control, 253
Contractile agonists, 183
Coronary blood flow, 285
Cranial window, 315
Cremaster muscle, 356
Cultured endothelium, 46

Diabetes mellitus, 149
Dibutyryl cAMP, 91
Diameter, 315
Dihydropyridine sensitive Ca^{2+} channels, 357

Edema, 21, 437
Edematogenic agent, 437
EDRF, 92, 183, 427
Efferent lymph vessels, 409
Endogenous vasodilators, 409
Endothelial, 159
Endothelial cells, 355, 427
Endothelial cell/smooth muscle, 409
Endothelial membrane fluidity, 46
Endothelin, 355
Endothelium, 369
Endothelium dependence, 91
Endothelium-dependent relaxation, 427

Endothelium dependent relaxing factors, 92
Endothelium-derived relaxant factor, 427
Endothelium derived vasodilators, 369
Epinephrine, 159
Erythrocyte, 149
Erythrocyte aggregation, 35
Erythrocyte membrane, 150
Erythrocyte membrane fluidity, 36
Ethanol, 107
Extracellular magnesium, 427

Fatty acid probes, 35
FITC-Dx-150 clearance, 67
Flow, 315
Fluorescence techniques, 36
Fluorescent probe, 46
Forelimb, 3, 253
Forelimb resistance, 253

H_2O_2, 46
Hematoporphyrin, 343
Hepatic encephalopathy, 46
Heterogeneity, 285
High-protein oedema, frequency of, 457
Histamine, 3, 159, 409, 437
Homeostasis, 211
HR, 457
Hypertension, 356
Hypotension, 315

Inflammatory mediators, 437
Inflammatory process, 437
Intracranial pressure, 315
Ischemia, 21
Ischemia of the skeletal muscle, 108

Kidney, 397

Large artery, 465
Laser doppler, 343
Liver capillary blood flow, 344
Lymphatic constriction, 409
Lymphatic perfusion pressure, 409
Lymphatic system, 409
Lymphatic vessels, 409
Lymph flow, 3, 437
Lymph nodes, 409
Lymph parameters, 437

Macromolecular escape, 67
Macrophages, 457
Macrorheological parameters, 36
Magnesium, 268
Membrane fluidity, 149
Methylene blue, 427
Mg^{2+} deficiency, 431
Mg^{2+} regulated internal Na^+ dependent Ca^{2+}, 427
Mg^{2+}-regulated Na^+-Ca^{2+} antiport mechanism, 431
Mg^{2+}-regulated Na^+-Ca^{2+} exchange, 428
Microelectrode, 127
Microvascular, 67
Microvessels, 356
Monocrotaline, 268
Mouse brain, 91
Myeloperoxidase, 21

Na^+-Ca^{2+} exchange, 427
Natural flow, 465
Neurokinin A, 253
Neurokinin B, 253
Nifedipine, 355
Non-insulin dependent diabetes mellitus, 149

O-(ß-hydroxy-ethyl)-rutosides, 457
Oedema, 457
Oxygen, 127
Oxygen sensitivity, 127

PAF, 437
Perfused lymphatics, 409
Pericyte, 159
Peripheral circulation, 465
Perivascular nerves, 465
pH, 127, 315
Phenylephrine, 285
Phosphatidyl-ethanolamine, 149
Phospholipids, 36, 149
Photodynamic therapy, 343
Photoradiation, 343
Pial arterioles, 369
Pial microvessel, 315
Platelet activating factor, 437
Polymorphonuclear leukocytes, 21
Prenodal, 409
Protein concentration, 3, 437
Protein transport, 437
Proteolysis, 458
Pulmonary circulation, 211
Pulmonary hypertension, 267
Pyrrolizidine alkaloid, 268

Rats, 21
Red cell Ca^{2+} content, 35
Red cell deformability, 36, 150
Red cell membrane fluidity, 35
Renin, 67
Resistance vessel, 253, 465
Rete, 159
Ruthenium red, 395

Secondary acute inflammation, 458
Silica, 457
Skeletal muscle, 21, 107, 253, 355
Skeletal muscle circulations, 465
Skin, 253, 465
Small vessel resistances, 253, 465
Sodium-calcium exchange, 427
Sodium ions, 427
Sodium nitroprusside, 315
Spontaneously hypertensive rats, 355
Subarachnoid hemorrhage, 369
Systemic arterial pressure, 465
Systemic circulation, 211

1-Terbutaline, 437
Terbutaline, 3
Tissue, 127
Total forelimb resistance, 465
Transvascular fluid and macromolecular flux, 437
Tridymite silica, 459
Trypan blue-albumin complex, 46
Tumor blood flow, 343

Umbilical-placental circulation, 184
Uridine triphosphate, 369

Vascular reactivity, 183
Vascular resistances, 465
Vasoactive, 183
Vasoactive lipid, 437
Vasodilation, 465
Venous O_2 saturation, 285
